

I-Mab BioPharma (IMAB US)

Partnership with Sinopharm to prepare for commercialization in China

- Partnership with Sinopharm laid a solid foundation for commercialization in China.** I-Mab recently entered into a partnership with Sinopharm to prepare the commercialization of its portfolio assets in China. I-Mab will authorize Sinopharm's 300+ subsidiaries as distributors across China to support distribution and retail allocation to terminal markets. Sinopharm will help I-Mab to establish a GSP company to manage the logistics and commercialization which is expected to receive a GSP license in mid-2022. The partnership will accelerate the commercialization and go-to-market process of I-Mab's commercial assets. Meanwhile, I-Mab is building its commercial team with a target size of 200 people before the launch of Felzartamab (anti-CD38 mAb) next year.
- Rapid development of diversified and highly-differentiated core assets and rich upcoming catalysts.** **Lemzoparlimab (anti-CD47 mAb):** For NHL treatment, the preliminary data of a phase 2 US trial of lemzoparlimab in combination with rituximab in NHL will be presented at ASH 2021 Meeting in mid-Dec. I-Mab also plans to initiate a registrational trial in NHL in China in 2022E. For **AML/MDS** treatment, patient enrollment of the phase 2 China trial of lemzoparlimab in combination with azacitidine is on track for completion in 4Q21E. I-Mab plans to initiate a registrational trial for MDS in China in 2022E. For **solid tumors** treatment, the data readout of the US trial of lemzoparlimab in combination with Keytruda in solid tumors is expected in early 2022E. In China, NMPA has recently approved the initiation of a phase 2 trial of lemzoparlimab in combination with toripalimab in solid tumors. **Uliledlimab (anti-CD73 mAb):** Data of a phase 2 China trial in solid tumors is expected in 1H22E, and a phase 2 trial in the US will be started in 4Q21E. We expect I-Mab to finalize a sizable license-out deal of uliledlimab with a global MNC partner in early 2022E. **Felzartamab (anti-CD38 mAb):** Felzartamab, the first drug expected to be brought to the market, is on track to submit BLA for 3L MM in China by 4Q21E. I-Mab has completed patient enrollment of a phase 3 registrational trial of felzartamab in combination with lenalidomide for 2L MM, with a target of BLA submission in 2023E. **Bispecific antibodies:** Data from preclinical studies of two bispecific antibodies, **TJ-CD4B** (targeting Claudin18.2 and 4-1BB) and **TJ-L14B** (targeting PD-L1 and 4-1BB), will be presented at the **SITC 2021 Meeting** in mid-Nov.
- Maintain BUY.** We like I-Mab given its highly-differentiated global FIC/BIC asset portfolio and promising long-term outlook driven by developing "super antibodies". We maintain our DCF-based TP unchanged at US\$101.37 (WACC: 9.74%, terminal growth rate: 3.0%).
